

# What would happen if we cut all trees?

Nele Schmitz

## ? Question setting

Iain H. Woodhouse

## 💡 Findings

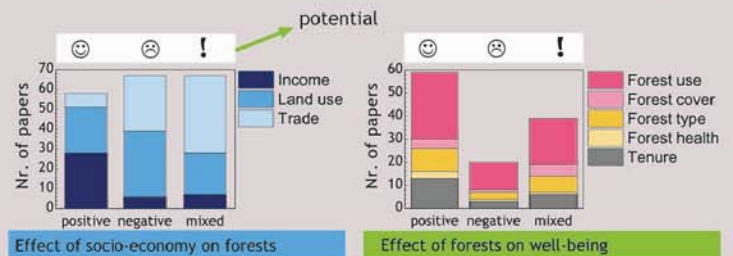

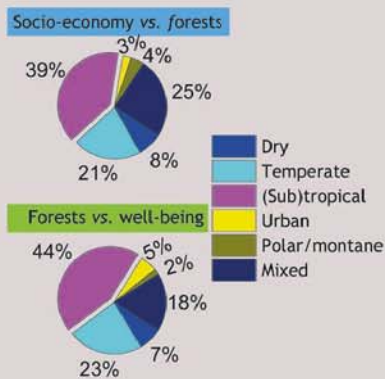

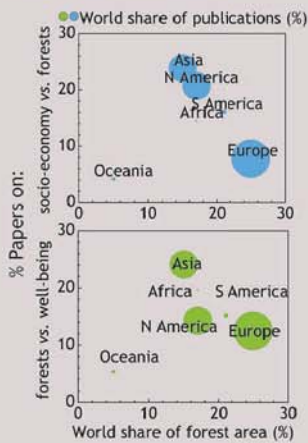

### KNOWLEDGE GAPS

### INTERACTIONS

#### Bias in continents studied

#### Bias in habitat types studied

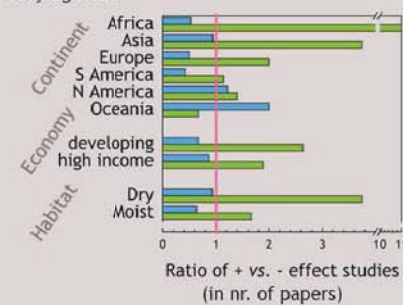

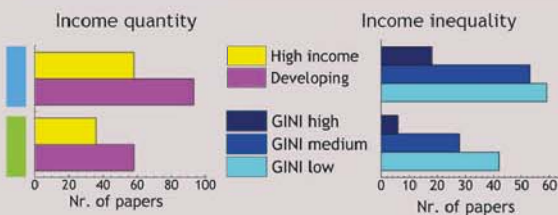

#### Effects as mentioned in the literature

#### Bias in countries of different economy studied

Mainly negative effects ← 2  
 ← varying with: →  
 → 1 → Mainly positive effects

Countries studied in min. 3 papers

World Bank estimates of:  
 Income quantity via GNI per capita, calculated using the World Bank Atlas method (low & middle income countries were grouped into "developing").  
 Income inequality via the GINI index, where 0 represents perfect equality and 100 perfect inequality

## ⇒ Future targets

Top 3 most mentioned cause/effect traits
